

_OFFER VALID FROM 01.05 – 30.06.2026

DC150 – Powerful and versatile in Perform product line

Benefit now from a 50% price advantage

BENEFITS FOR YOU

- Can be used universally with all materials
- Shank variants for all chucks commonly used for drilling, such as whistle notch chucks, hydraulic expansion chucks, collet chucks, shrink-fit chucks and power clamping chucks

140° point geometry
for universal use with
many materials

WJ30RE grade
Can be used universally for optimum
protection against wear

In accordance with DIN 6535
with h6 tolerance

**YOUR
SAVINGS**

50 %

THE APPLICATION

- For ISO material groups P,M,K,N,S,H,O
- Can be used with oil and emulsion
- Areas of use: General mechanical eng., mold and die, automotive, energy
- Universal use

Walter Titex DC150.

THE TOOL

- Solid carbide twist drill
- WJ30RE grade
- 140° point angle
- Dimensions in accordance with
 - DIN 6537, short $3 \times D_c$
 - DIN 6537, long $5 \times D_c$
- Diameter range 3 – 20 mm
- Shank in accordance with DIN 6535 HA and HE

THE APPLICATION

- For ISO material groups P, M, K, N, S, H, O
- Can be used with oil and emulsion
- Areas of use: General mechanical engineering, die and mould making and the automotive and energy industries

BENEFITS FOR YOU

- Can be used universally with all materials
- Shank variants for all chucks commonly used for drilling, such as whistle notch chucks, hydraulic expansion chucks, collet chucks, shrink-fit chucks and power clamping chucks

Walter Titex Perform

Product family: DC150

_ SUPREME, ADVANCE, PERFORM

The Walter product lines – Expertise to the power of three.

All Walter tools are characterised by maximum precision and process reliability. You can create real added value by finding a product range which precisely meets all of your requirements. With three product lines in its premium segment, Walter has the solution to match your requirements.

Supreme

Within the Supreme line, you will find tools with optimised machining qualities. These tools are always the first choice if you require high cutting speeds and the longest tool lives, most efficient for processing large batch sizes. Supreme tools are designed for machining very specific material groups, and often considerably outperform comparable tools.

Advance

Are you looking to strike the ideal balance between the most cost-effective production possible and long tool life? The strengths of the tools in the Advance line come into play best in series production applications with medium batch sizes. Their key aspects include affordability as well as excellent performance data and a wide range of different models.

Perform

The tools in the Perform line help you to ensure excellent profitability and cover an impressively wide range of applications. They are ideal for use with a wide variety materials, for processing small and medium batch sizes.

Solid carbide twist drill DC150 Perform

Reconditioning to the original manufacturer quality really pays off

The Reconditioning Service from Walter MultiPLY makes a significant contribution towards lowering your production costs. This service can provide you with Walter Titex and Walter Prototyp tools that are as good as new, in the original manufacturer quality and all at an attractive price-performance ratio.

Reconditioning Service
Original Walter Quality

OUR MARK OF 100% QUALITY

Look out for the "Original Walter Quality" label. This label indicates that a tool has been reconditioned to original manufacturer quality. It even appears in the ordering documents, enabling you to see the tools for which we recommend our Reconditioning Service.

50% LOWER COSTS!

Tools are often disposed of far too early, even though the Walter Reconditioning Service can restore the tool a number of times to original manufacturer quality. Benefit from reduced costs, reliable production processes and consistent tool life by having your tools reconditioned at our Reconditioning Centre, which is available worldwide. That's how you save up to 50% on your tool costs!
