

_OFFER VALID FROM 01.05 – 30.06.2026

Next generation drilling – with X'treme Evo.

Benefit now from a 50% price advantage

Product Advantages

- High productivity in different materials
- Fast guidance in the hole
- Excellent positioning accuracy
- Universal use

MAXIMUM PRECISION AND PROCESS RELIABILITY

The X'treme Evo is the full package, with a perfect combination of winning features.

Walter's own extremely wear-resistant WTJ30ET and WJ30EU grades consist of the very tough K30F micrograin substrate plus the TiSiAlCrN/AlTiN multi-layer coating.

This makes it possible to achieve a long tool life and high cutting values. The advanced fourth land is engaged quickly and consequently optimises drill guidance, particularly for inclined entries and exits.

FACE & APPROACH

A new type of face geometry creates a large amount of space for chips in the centre and improves chip removal in soft materials in particular. The steep approach angle reduces the feed force and improves the positioning accuracy.

Innovative new positive approach for reduced cutting force

FOURTH LAND

Fourth land in advanced position to ensure fast guidance in the drilled hole

The WJ30ET and WJ30EU grades comprise

Solid carbide twist drill DC160 Advance X•treme Evo

Reconditioning to the original manufacturer quality really pays off

The Reconditioning Service from Walter MultiPLY makes a significant contribution towards lowering your production costs. This service can provide you with Walter Titex and Walter Prototyp tools that are as good as new, in the original manufacturer quality and all at an attractive price-performance ratio.

Reconditioning Service
Original Walter Quality

OUR MARK OF 100% QUALITY

Look out for the "Original Walter Quality" label. This label indicates that a tool has been reconditioned to original manufacturer quality. It even appears in the ordering documents, enabling you to see the tools for which we recommend our Reconditioning Service.

50% LOWER COSTS!

Tools are often disposed of far too early, even though the Walter Reconditioning Service can restore the tool a number of times to original manufacturer quality. Benefit from reduced costs, reliable production processes and consistent tool life by having your tools reconditioned at our Reconditioning Centre, which is available worldwide. That's how you save up to 50% on your tool costs!

Find out more at: www.reconditioning.walter
